

# Fleet Management Solutions

## Waste and Recycling

## Real Time Visibility Of Real Challenges

### + Regulatory Challenges

Ensure camera compliance for incident avoidance and regulatory compliance with the North American introduction of Surround Vision Technology

### + Route Management

Manage and predict pickup routes at ease to understand when routes are completed and where delays may happen

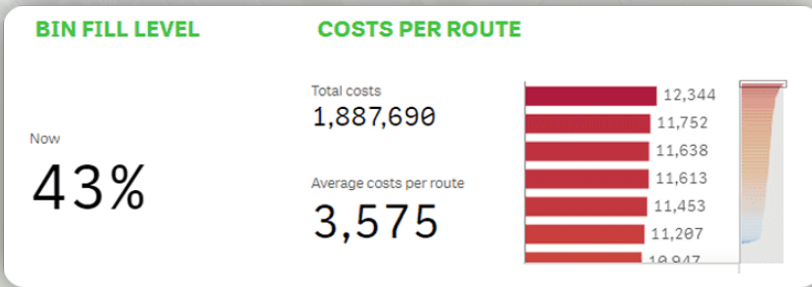

### + Productivity Demands

Manage workers, vehicle maintenance and loading processes in real time to optimize the coordination of activities and maximizing productivity

### + Increasing Size and Scale

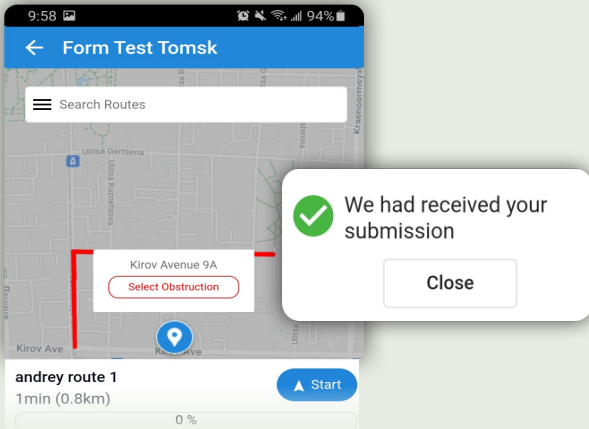

Ensure deployment is continuously analyzed and improved upon to focus on scaling and meeting customer needs

# Leading Solutions

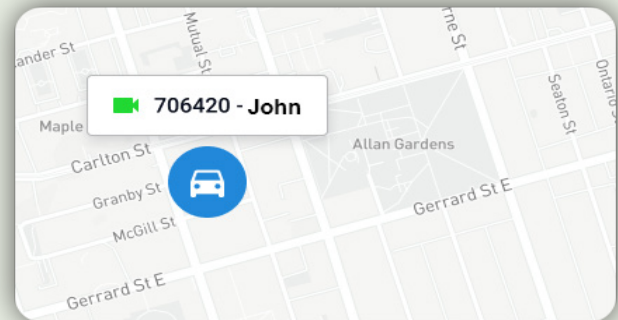

## ZenBin Bin Fill Tracker

Locate bin data on an easy to use map that gives you fill level, location, history, route exception rules, and much more

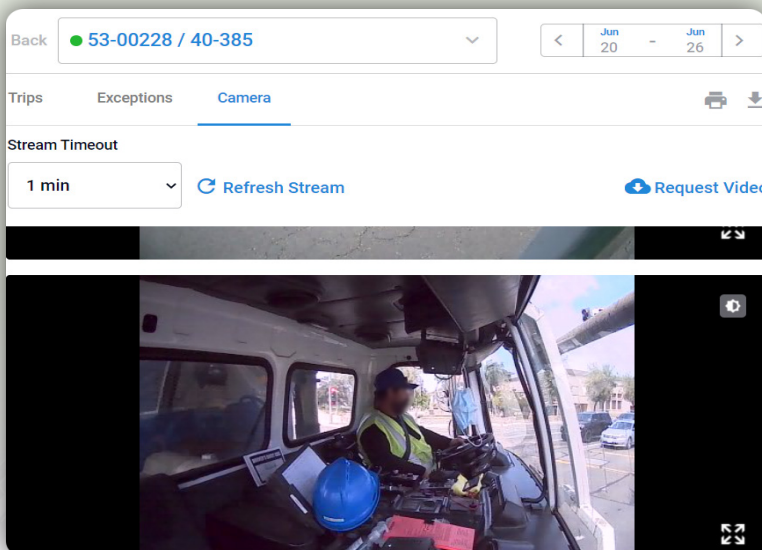

## Driver Apps: ZenduWork & ZenduMaps

Allow teams to quickly submit forms on their mobile devices and notices of route discrepancies that management can use to notify customers

## GPS Tracker & Mobile Dispatch

Have real-time vehicle locations and dispatch contract teams to investigate route discrepancies or service high fill level bins to combat bin overflow

## 360 Cameras

View real-time 360 video feeds of vehicles and drivers to reduce dangerous driving, conduct real-time coaching and meet regulatory standards with Surround Vision Technology - even store footage on the cloud to later review

“ After considering the many options available, we trusted the reliability and capabilities of GoFleet and after implementation, we noticed an increased level of visibility, reliability, productivity and reporting. ”
