

Contents - Vol. 16, Fasc. 1-4

<i>Acad. Bl. Sendov's 70th Anniversary:</i>	
An Official Celebration	7
Curriculum Vitae	11
List of Publications	13
<i>I. Angelov, N. Kyurkchiev</i>	
On the Behavior of Approximations of of the SOR Tanabe's Method	35
<i>M.D. Takev</i>	
Direct and Inverse Approximation Theorems in \mathbb{R}^2	53
<i>A.W. Goodman</i>	
Pure Multigrades	63
<i>V. A. Abilov</i>	
On the Convergence of Multiple Fourier Series and Quadrature Formulae	73
<i>F. Schipp</i>	
On Walsh Functions with Respect to Weights	95
<i>A. Aziz, W. M. Shah</i>	
On the Location of the Zeros and Critical Points of a Polynomial	105
<i>G.V. Milovanović, A. Petojević</i>	
Generalized Factorial Functions, Numbers and Polynomials	113
<i>P. Mache, M.W. Müller</i>	
The Method of Left Baskakov Quasi-Interpolants	131
<i>G. Anastassiou</i>	
On H-Fuzzy Differentiation	153
<i>L. Lorch</i>	
Comparison of a Pair of Upper Bounds for a Ratio of Gamma Functions	195

<i>G. Schmeisser</i> Estimates for the Imaginary Parts of the Zeros of a Polynomial	203
<i>M.A. Qazi, Q.I. Rahman</i> On the Growth of Harmonic Polynomials	219
<i>Yu. Kryakin</i> Whitney's Constants and Sendov's Conjectures	235
<i>A. Jakimovski, A. Sharma</i> Quantitative Results on Equiconvergence of Certain Sequences of Rational Interpolants	249
<i>F. Altomare, R. Amiar</i> Asymptotic Formulae for Positive Linear Operators	283
<i>A. Aziz, B.A. Zargar</i> On Gauss-Lucas Theorem Concerning the Location of the Critical Points of a Polynomial	305
<i>L. A. Harris</i> Markov's Inequality for Polynomials on Normed Linear Spaces	315
<i>G. Beer</i> On the Compactness Theorem for Sequences of Closed Sets	327
<i>Yu. Brudnyi</i> Nonlinear Piecewise Polynomial Approximation of Functions from Besov Spaces	339
