

Current Issue - Vol. 25 (2011), Fasc. 1-2

G. Murugusundaramoorthy

Subclasses of Starlike Functions of Complex Order
Involving Generalized Hypergeometric Functions 1

M. K. Aouf, A. Shamandy, A. O. Mostafa and S. M. Madian

On Sandwich Theorem of Analytic Functions
Involving Integral Operator 15

Parvan E. Parvanov

Weighted Approximation by a Class of Bernstein-Type Operators 31

Borislav R. Draganov

On the Approximation by Convolution Operators in
Homogeneous Banach Spaces of Periodic Functions 39

Vesko Valov

External Characterization of I-Favorable Spaces 61

Peter Rusev

Zero-Distribution of a Class of Finite Fourier Transforms 79

Eugenia Pérez

Long Time Approximations for Solution of Evolution Equations from
Quasimodes: Perturbation Problems 95

Neli Maneva, Kraicho Kraichev and Krassimir Manev

Mathematical Models-Based Software Modernization 131

Papers Announced at MASSEE International Congress on Mathematics,
MICOM-2009, Ohrid, Republic of Macedonia 145

Miloš Čanak, Liljana Stefanovska and Ljubomir Protić

Schwarz Function for Vekua Complex Differential Equation 147

<i>Radoslava D. Goranova, Vladimir T. Dimitrov</i> Using Grid for Mathematical Researches	161
<i>L. Stefanovska, M. Čanak and Lj. Protić</i> Laplace Vector Field for Vekua Differential Equation	169
<i>Kostadin Trenčevski</i> Special Relativity Based on the $SO(3, C)$ Structural Group and 3-Dimensional Time	193
<i>Nikola Tuneski</i> On a Class of Functions Defined by Takahashi and Nunokawa	203
